

HandyRay Pro

LASER LANCING DEVICE

Innovative device for comfortable and safe blood collection

LMT-5000

HandyRay-Pro is an innovative laser device for the capillary blood sampling without a needle.

HandyRay-Pro makes the capillary blood collection comfortable and safe with low pain, no risk of cross infection and fast regeneration of skin.

Applications

- Glucose monitor
- Glycated hemoglobin (HbA1c)
- Blood laboratory
- Point of Care Testing (POCT)
- Various medical tests using capillary blood sample

For clinic & large hospital

LASER LANCING DEVICE LMT-5000

LAMEDITECH is an R&D-oriented medical device company which has developed the innovative laser medical devices based on the values of creativity and challenge

Feature

Low pain

No needle

No risk of secondary infection

Skin regeneration

Prevention of environmental pollution

Can be used with diagnostic devices

New function

01

Touch type aperture

02

Battery indicator

03

Cleaning vent

04

Charging cradle

Improved function

01

Faster laser charge

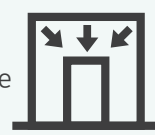

02

Longer product life cycle

03

Smaller single use cap size

04

Easier safety interlock
